ABOUT US

INTERGRUES is an independent group in Industry and Construction services.

The INTERGRUES group has 130 employees spread over 3 agencies set up in Morocco. With competence as a strategic priority, INTERGRUES is a general contractor, which aims to offer a complete package of services covering an expanding variety of fields..

Our services are organized around 4 key competency areas :

- Lifting – Handling
- Industrial transfers
- Lifting/Elevation of personnel: Hire of aerial work platforms
- Conventional and Spécial Transport

This mix of areas allows for an all encompassing approach, generating group-wide synergies.

The Group is characterized by :

- Total availability
- A comprehensive selection of options
- Flexible and reliable organization
- Geo-strategic locations
- A rigorous, technical approach
- Financial independency

By operating across such diverse sectors as petrochemical, chemical, energy, construction, pharmaceutical and steel, INTERGRUES has accrued a high level of expertise across the years. Today, it is an efficient and functioning organization, which offers client satisfaction through a tried and tested set of services.

FOUNDING PRINCIPLES

The INTERGRUES group, general contractor, is based on solid founding principles :

- A permanent vision of the future of our professions, allied with a spirit of anticipation
- A business culture founded on work, rigour and respect
- Loyal, devoted and competent staff
- Decentralised and independent sites unified by communal procedures
- Unflinching respect for safety and environmental regulation
- Powerful material resources
- Solid financial structuring, allowing for significant investments and regular development
- A return to permanent experience
- Numerous synergies, improving efficiency

COMMITMENTS

GROUP VALUES

Since its creation, INTERGRUES has founded its actions on strong values, which constitute a communal reference base for the business.

- Work
- Permanent rigour
- Respect of the physical and moral integrity of colleagues
- Respect for our clients and our providers
- The enduring loyalty of our colleagues and our clients
- The spirit of "service": listening, availability, reactivity
- A sense of social and societal responsibility

SAFETY POLICY

INTERGRUES is resolutely committed to a policy of stringent safety combined with consistent results, underpinned by an overarching set of procedures.

All activity of any nature engenders risks of varying degrees for man, its goods and the surrounding environment.

In order to reduce the likelihood of these risks as much as possible, the Group has put together a rigorous safety policy, with the respect of the physical and moral integrity of its employees and sub-contractors a fundamental and indispensable pillar of its commitments.

Through the strict application of these measures, we aim to:

- Reach zero accidents (with time lost or not)
- Avoid all bodily harm to staff
- Provide a quality service with a very high level of safety
- Reduce any risk of damaged goods/property

QUALITY POLICY

INTERGRUES Group has developed an organization whose objectives are to increase the efficiency of the operations it carries out as well as the satisfaction of its clients.

Our quality commitment is centred on the following principles :

- Guaranteeing the fulfilment of our client's needs
- Anticipation and management of risk
- Encouraging open exchanges with our clients
- Listening to our employees (flourishing of our workforce)

Our QUALITY policy, enriched with specific procedures is perfectly adapted to our client's QUALITY systems.

Always wanting to go further in this area, we also ask our clients for specific certification and we are open to external audits of our system.

The objectives of the Group are to permanently offer the client the level of QUALITY that they expect.

ENVIRONMENT POLICY

INTERGRUES, fully conscious of its responsibilities towards future generations, engages in a progressive approach to protect the environment and preserve the natural resources. Although our activities generate very little damage to the environment, we have developed an environmental approach enforcing respect for the environment at all levels of our organization and in a variety of contexts. Beyond our efforts impelled in order to prevent rather than to repair damage from pollution, we are involved in a process of constant awareness for the environment through the implementation of specific actions within our activities.

ACTIVITES

LOGISTICS AND LIFTING SERVICES

01 Lifting - Handling

CLASSIC LIFTING

We have a fleet of 34 recent cranes at our disposal spread over the entirety of our network. Our flexible organisation allows us to simultaneously cater for :

- Punctual operations - Contract-related services - Turn-key handling operations

This fleet of machines is specially adapted for operations that combine Mobility – Rapidity – Handling and implementation. Of a smaller size, it responds directly to the on-site size restrictions

HEAVY LIFTING

We have centralised our means and resources through an especially dedicated division for this type of operation. This specialised division is made up of heavy duty cranes (400 tons), specialised equipment (such as our 400 Ton gantry crane) and specialised transportation machines (such as our low-slung semi-trailer truck [articulated lorry]). From the lifting engineering to the coordination of all trade areas, it thus offers a complete set of turnkey services right up until the completion of the project. Our highly qualified teams along with our all inclusive, efficient logistics allow us to operate at the heart of diverse sectors, carrying out complex lifting of equipment, boiler parts etc.

ERECTION – HANDLING

Our teams of specialists take care of all turnkey operations.

- Erection of industrial units and metal works - Hand held carrying and shifting - Erection of tower-cranes

Our teams are made up of specialists, who are highly experienced in their professions of Erection, Lifting and Handling.

02 Lifting/Elevation of personnel: Hire of aerial work platforms

Associated with the lifting and transport package, the INTERGRUES Group's 'Elevation of personnel' division is specialised in the hire of equipment for work at height, which includes a diverse range of activity areas.

Directly responding to various uses, our range of aerial work platforms covers work at heights up to 41 meters.

All of our lifts are the result of a rigorous technical selection process and are well adapted to the particular project and your sites or installations. Our set of machines is principally made up of :

- VL Aerial lift trucks from 8 to 22 m (with or without operator) - PL Aerial lift trucks going from 12 to 26 meters (authorized operator required)

- Elevating platforms from 8 to 18m

Self-propelled aerial work platforms going from 12 to 41 m

03 Industrial transfers

Whether it is an internal transfer within a single site or an external transfer to another location, industrial transfers are a delicate operation and can have heavy risks attached. INTERGRUES, present in this market for many years, has responded to these requirements with adapted materials and logistics; equally a human organization made up of versatile and multi-functional teams for operations in Morocco and internationally. We take charge of a large variety of transfers: factory, unit, production line, machines, industrial materials, assembly/disassembly and reimplantation as well as preparation, handling and transport operations. We orchestrate all movements involved in re-structuring or transferring to a new site, by carrying out :

- A preliminary analysis of requirements - A diagram defining the different operational phases - An analysis of technical constraints

- Management of all trade bodies - Respect for requirements and deadlines

We have competent and multi-skilled technicians (in mechanics, handling and electricity) at our disposal, who are capable of ensuring the complete transfer of your production.

04 Conventional and Spécial Transport

We have a complete set of transport machines, spread across our network of agencies, fulfilling the needs of :

- Classic/conventional transport

We organise the delivery and unloading/installation of your materials, equipment and merchandise.

Our fleet of 25T semi-trailer/hydraulic arm trucks allows us to provide the flexible and efficient logistics required for transport operations.

- Specialisedany-distance transport

Thanks to our low-bed machines, such as our low-loader trucks, we are able to transport heavy/high volume loads whilst staying in complete control.

LEVAGE

Un parc de grues mobiles pour tous les travaux de levage.

GRUES MOBILES >
DE 25 À 300 TONNES

TERRASSEMENT

Location de matériels pour le bâtiment, travaux publics et routiers.
